

# Rainwater

A more sustainable  
drainage solution

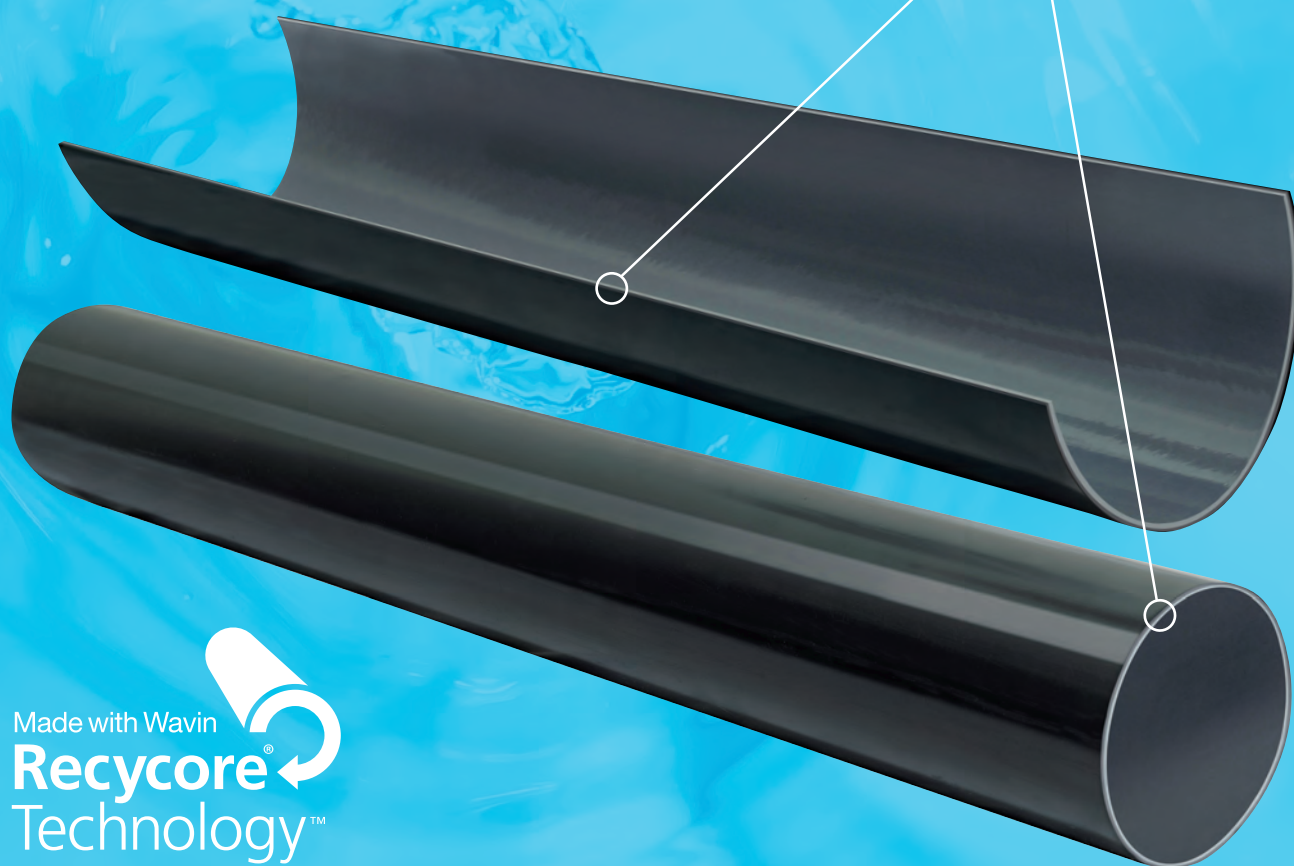

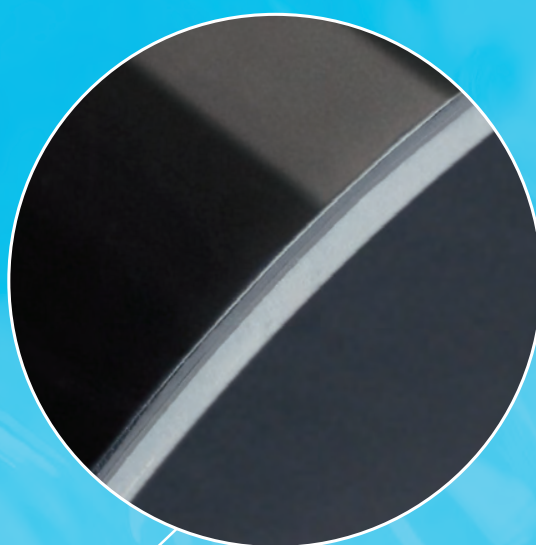

# Wavin Recycore technology

Wavin Rainwater System

## Manufactured from 55% recycled PVC-U

- ① With Wavin Recycore technology, the new range of gutter and downpipes will contain a minimum of 55% recycled PVC-U by weight.
- ① Recycore gutter and pipe will feature an outer layer manufactured with glossy virgin PVC-U and an inner 'Recycore' layer for a sustainable solution.
- ① The recycled inner layer will vary in colour to the outer layer. All black and grey gutter and downpipes will have a dark grey inner. White will have a white shade for the inner layer.
- ① Both gutter and downpipe will continue to provide the same high level of performance you have come to rely on from Wavin.

# The smart, sustainable and greener drainage solution

As part of Wavin's global commitment to sustainability, we have a clear ambition to lead the industry in sustainability by 2025.

Our innovative Recycore Technology combines sustainability with reliability and performance, to create industry leading drainage products.

Our Rainwater range is no exception. Recycore Rainwater has been manufactured using a higher level of recycled PVC-U helping to deliver a more sustainable solution.

With around 30% of Wavin products currently made from recycled material, our manufacturing processes demonstrate our commitment to help build healthier, more sustainable environments for future generations.

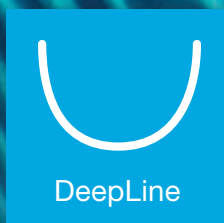

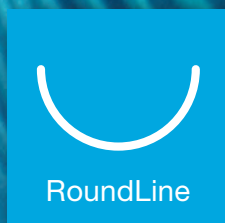

The outer PVC-U layer uses virgin plastic to provide a high quality, long lasting durable finish.

# Wavin Rainwater Recycore roll out plan 2022.

Wavin RoundLine, SquareLine and DeepLine will be manufactured with Recycore as a continuous improvement process commencing in 2022.

Gutter and downpipe manufactured with Recycore will be marked with Recycore® logo.

Wavin is part of Orbia, a community of companies working together to tackle some of the world's most complex challenges. We are bound by a common purpose:  
To Advance Life Around the World.
